PROFESSIONAL SUMMARY

Results-driven AI Engineer and AI Consultant with hands-on full-time and internship experience building real-world AI-powered SaaS products. Proficient in Generative AI, Retrieval-Augmented Generation (RAG), LangChain, LangGraph, and Python. Demonstrates strong product thinking by independently designing, building, and shipping solutions that solve measurable problems — from gym management automation to society tenant tracking. Experienced in integrating WhatsApp API, biometric systems, QR-based automation, and n8n workflows into production-ready products.

WORK EXPERIENCE

Junior AI Consultant | NeuratantraAI

July 2026 – Present

Full-time • Indore, India

- Promoted from AI Product Management Intern to Junior AI Consultant, taking on a full-time advisory role in designing and scaling AI-powered SaaS solutions for the company's gym management product.
- Led end-to-end product development of an AI-powered gym management system — identifying the core pain point of manual attendance tracking and designing a scalable digital solution from scratch.
- Built and shipped a QR code-based attendance system with biometric device integration, eliminating manual entry and reducing attendance logging time significantly for gym staff.
- Integrated WhatsApp Business API with n8n automation workflows to trigger real-time personalized notifications — including automated fee payment reminders when members missed due dates, improving collection follow-up efficiency.
- Defined product requirements, user flows, and feature roadmaps while coordinating with developers to ensure timely delivery of features across the gym management platform.

AI Intern | NeuratantraAI

November 2025 – June 2026

Internship • Indore, India

- Owned the initial product discovery and MVP scoping for the gym management platform prior to transitioning into the full-time Junior AI Consultant role.

Frontend Web Development Intern | CodeTech IT Solutions Private Limited

July 2025 – August 2025

Internship (4 weeks) • Remote

- Completed a 4-week online internship (Intern ID: CT04DZ134) focused on Frontend Web Development, building and refining UI components under mentorship.
- Demonstrated dedication, creativity, and technical proficiency across assigned projects, with consistent, incremental improvement in problem-solving and innovation.

TECHNICAL SKILLS

AI & ML: Generative AI, RAG, Agentic AI, Large Language Models (LLMs), Prompt Engineering, NLP, Machine Learning

Frameworks & Libraries: LangChain, LangGraph, Ollama, Streamlit, Hugging Face

Programming Languages: Python, SQL, JavaScript

Automation & Integrations: n8n, WhatsApp Business API, REST APIs, Biometric Integration, QR Code Systems

SaaS & Product: Product Roadmapping, User Research, MVP Development, B2B Product Strategy, Customer Discovery

Tools & Platforms: Git, GitHub, React, Supabase, Vercel, VS Code, Jupyter Notebook

PROJECTS

SocietyTrack — AI Rented Family Tracking System (SaaS) | React, Supabase, Python, LangChain, n8n

- Identified a real problem in Indian housing societies — tenants misreporting move-in duration, causing societies to lose ₹30,000–₹60,000 annually in unpaid dues.
- Built a full-stack SaaS with 3 role-based dashboards (Admin, Owner, Security Guard), automated dues calculation engine, and real-time updates via Supabase Realtime.
- Implemented an auto-flag penalty system and WhatsApp reminder dispatch for non-compliant owners, with proof upload for all payment and move-out events.

DocuFill — Document Formatting Solution for Students (SaaS) | *Python, AI/LLM, React, Supabase*

- Designed an 'Analyze Once, Serve Many' architecture where faculty uploads a template once, AI parses and stores the structure, and students instantly get a form to fill — eliminating repeated AI token costs.
- Built an AI document parser detecting fillable regions (blank lines, placeholder text, empty tables, dummy content) across any document variety and converting them into structured page-by-page form fields.
- Validated B2B monetization model through customer discovery with faculty — confirming pain points around WhatsApp-based submission chaos and NAAC accreditation reporting gaps.

AI Agent Marketplace | *Python, LangGraph, LangChain, Agentic AI*

- Architecting a scalable AI agent marketplace integrating multiple specialized agents for productivity and automation using LangGraph's stateful orchestration.
- Applying modular design principles to enable seamless inter-agent communication and future extensibility with third-party services.

PUBLICATIONS

Improving Workforce Management with Smart Headcount (AI Based System)

Journal of Emerging Technologies and Innovative Research (JETIR) | May 2025

- Authored and published a peer-reviewed research paper on an AI-based smart headcount system for improving workforce management, indexed with a 7.95 impact factor.

CERTIFICATIONS

- Google Cloud Career Launchpad — Generative AI Leader Track | Google Cloud | September 2025
- India AI Impact Buildathon — Certificate of Participation | GUVI × HCL, AI Impact Summit 2026 | February 2026
- KRIYETA 4.0 — National-Level Hackathon | Acropolis Institute of Technology and Research | April 2025
- Ethical Hacking — NPTEL Online Certification | SWAYAM / Skill India | Jul – Oct 2024 | Score: 57%
- Content Writing Competition — Ingenious Engineer Enthusiasts Exploration | Acropolis Institute (CSIT Dept.) | September 2023

EDUCATION

Bachelor of Technology — Computer Science | **Acropolis Institute of Technology and Research (AITR), Indore** 2022 – 2026

- CGPA: 7.8

Senior Secondary (Class XII) | **SSS-10, Bhilai** 2022

- 84%

High School (Class X) | **SSS-10, Bhilai** 2020

- 76%

PERSONAL PROJECTS

- Created and maintained QuickJobSpot — a content website focused on job opportunities and recruitment news for Indian job seekers.
- Developed ExploreEpicTraveling — a travel-focused website providing destination guides, travel tips, and curated travel insights.
